

Our Solutions for the Oil and Gas  
Industries

## FEPM MATERIAL - AWC727

Chesterton Customseal FEPM rubber material is ideal for use in the oil and gas industry.

This chemical resistant material can be used to create machined O-rings and specialized custom seals made right here in our Chesterton Customseal warehouse. These custom seals offer a unique solution every time.

FEPM also allows for superior electrical insulation, making it perfect for use in power, electrical grids and applications. This material is just one of Chesterton Customseal's impressive range and can be used in most applications and industries.
